MUSIC FOR 30 PEDALS

Performing sound installation
Hugo Roussel

TECHNICAL SHEET

(Version : september 2018)

SPACE CONFIGURATION

In its initial form, *Music for 30 pedals* is arranged lineally, and requires a space from 17 to 24 meters long (see the technical sheet). It can eventually be adapted to smaller spaces by altering its layout. Except for the device (guitarist, pedals and amp), the space allocated to the installation must be empty. No chairs are to be made available to the public, they may only sit on the floor or stand. The installation requires no special lighting.

DURATION

One set lasts about 20 minutes. It is however advisable to provide two consecutive sets (with a break of 15 minutes between them), to which the same public can participate, for a total duration of about 60 minutes.

HEARING PRECAUTIONS

Due to the volume generated by the installation the public are advised to use the earplugs provided.

TECHNICAL REQUIREMENTS

- 100 W guitar amplifier head
- 4×12 speakers cabinet
- Power supply and extension cable
- Chair without arms or keyboard seat
- Earplugs (public)
- A technician during the setup

SETUP, SOUNDCHECK & DISMANTLING

- Setup : 120 minutes
- Soundcheck (no audience) : 30 minutes
- Dismantling : 60 minutes
